Dear Sir/Madame,

I would like to support the XM satellite radio's drive for the right to provide quality and varied radio programming. The recent push of the NAB to squelch the traffic and weather programs on XM radio is an abridgement of my right to good radio programming which I pay for.

I'd really like to listen to radio that is not inundated by a chronic bombardment of advertizing. Let's bring sanity back to the air waves!

Thanks for listening. Try XM. You'll like it.

Sincerely,
Daniel Fox
